Professional Profile

ENGINEERING WITH HUMAN PURPOSE.

A cross-disciplinary practice connecting systems, communities, data and creative communication.

I am a humanitarian engineering practitioner, AI creator, data analyst, and independent artist dedicated to solving meaningful problems through engineering, artificial intelligence, and storytelling. I completed three years of Electrical Engineering studies at Addis Ababa University before continuing my development through professional experience and self-directed learning. My work has included construction, electrical installation, humanitarian engineering, data analysis, AI-assisted creative systems, and independent artistic production. During the humanitarian crisis in Tigray, I contributed to the construction and electrical installation of temporary shelters for internally displaced people, community food-security initiatives, and artistic outreach for people affected by conflict. Today, I use artificial intelligence to create educational content, visual storytelling, and creative systems that connect technology with human-centered impact.

Core Expertise

Humanitarian Engineering

Electrical Installation

Data Analysis

Artificial Intelligence

Prompt Engineering

Community Development

Creative Leadership

AI Storytelling

Problem Solving

Education

Addis Ababa University

Electrical Engineering • Coursework through Third Year

Completed three years of Electrical Engineering coursework, building a strong foundation in electrical systems, engineering design, mathematics, programming, and analytical problem-solving. Continued developing practical engineering knowledge through professional work and independent learning.

SOS Hermann Gmeiner School

Information & Communication Technology • Graduated July 8, 2012

Basic computer training in computer applications, Microsoft Office, digital literacy and information technology.

SUPPLIED CREDENTIAL

ICT Diploma

Information and Communication Technology and Basic Computer training from Hermann Gmeiner School, Mekelle.

Training Included

- Computer Applications
- Microsoft Office
- Digital Literacy
- Information Technology

Professional Experience

MLWDA • VERIFIED EXPERIENCE LETTER

Mujiejuguwa Loka Women Development Association

Senior Engineer • March 15, 2022 - February 8, 2025

The supplied letter confirms engineering planning, implementation, supervision and coordination of assigned activities, with professionalism, technical competence and strong teamwork.

- Engineering planning and implementation
- Supervision and coordination
- Technical documentation
- Field and team support

ARCADIA

Arcadia Consultancy One Membership PLC

July 2, 2020 - October 3, 2022

Humanitarian Engineering Volunteer

- Electrical installation of temporary shelters
- Construction support
- Humanitarian engineering
- Community infrastructure

CONSTRUCTION

Henok Teferi Construction PLC

2017 - 2019

Assistant Engineer

- Construction supervision
- Budget management
- Team leadership

Humanitarian Impact

Practical systems, community resilience and creative care during crisis.

01

Humanitarian Engineering

- Construction of temporary shelters
- Electrical installation
- Community infrastructure
- Service evidence and field contribution

02

Food Security Initiative

- Vertical farming
- Fish farming
- Organic compost
- Community awareness

03

Healing Through Art

Original music performances for displaced communities and survivors of conflict-related trauma, supporting hope, resilience and emotional connection.

“Impact begins when technical skill becomes public service.”

A portfolio of practical contributions across shelter, infrastructure, food systems and artistic outreach.

Artist — AGEEZ

ALBUM

Wiledi Nguski

Released September 19, 2025

Created and independently released an eleven-song album exploring healing, resilience, freedom, and personal growth. The album combines music with AI-assisted visual storytelling to communicate ideas of hope, recovery, and human potential.

STREAM

Spotify

Listen to the album and artist catalogue.

WATCH

YouTube

Watch visual storytelling and music videos.

Prompt Engineering

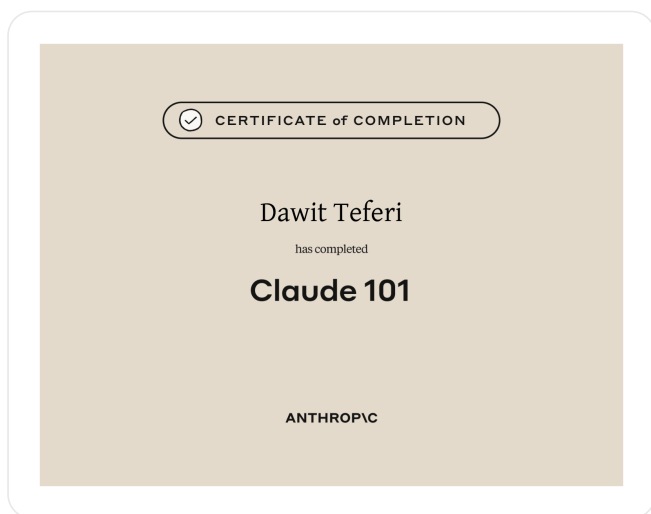

AI Storytelling

Leadership

- Led engineering teams during construction projects.
- Organized volunteers during humanitarian initiatives.
- Mentored communities on sustainable food systems.
- Directed a team of musicians during production of an independent album.

Certifications & Credentials

Authentic evidence embedded from the supplied certificate files.

Claude 101

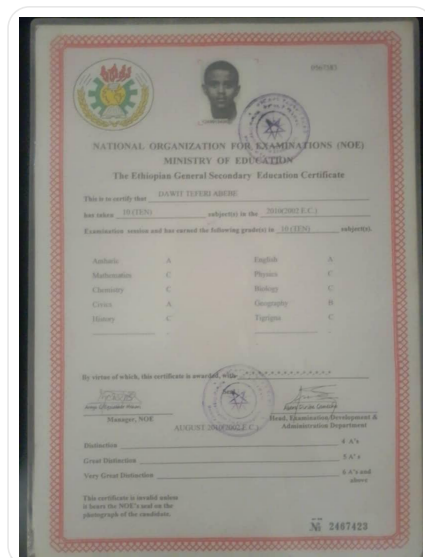

Anthropic certificate of completion

AI Fluency: Framework & Foundations

Anthropic AI fluency certificate

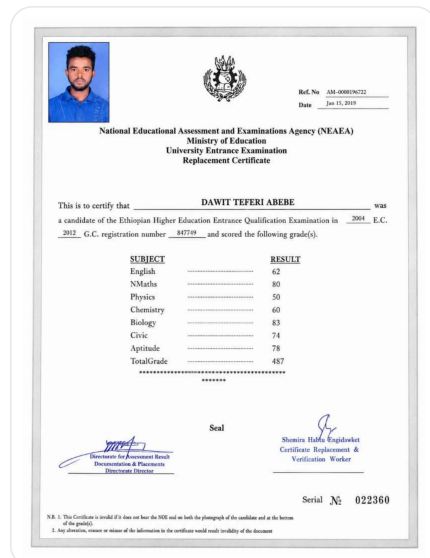

Educational Credentials

General Secondary Education Certificate

ICT Diploma

University Entrance Certificate

Tigrinya

Selected Projects

01

FIELD ENGINEERING

Humanitarian Shelter Engineering

Supported construction and electrical installation of emergency shelters for displaced families.

02

COMMUNITY SYSTEMS

Community Food Security

Developed awareness initiatives for vertical farming, fish farming and compost production.

03

CREATIVE TECHNOLOGY

AI Storytelling

Designed AI-assisted creative workflows combining language models, image generation, music and video production.

04

INDEPENDENT ART

Music Portfolio

Produced the album Wiledi Nguski under the artist name Ageez.

Contact

Engineering, artificial intelligence, data and human-centered storytelling.
